Continue.....

# Action Plan

Continue.....

We will make our students learn to communicate better in the following ways:

- There will be two groups among students-those who have some debating skill or knowledge regarding topics and those who don't.
- For those who have some skill we will work for their improvement by consulting with faculty or trainers and making them learn new topics relating to current affairs or business world.
- For those who don't have skills, we will arrange special training with the help of teachers and video recording. These category of students will be asked and motivated to speak more and read more. Their speech will be recorded and analyzed with them to find out their fault and correct it. This recording and correction will be a continuous process.

**THANK YOU**
